## STATEMENT

---

«Materia ~ tempo ~ vulnerabilità» è impronta dell'uomo, così come della natura, appartenenti alla stessa essenza.

La materia s-velata e s-figurata dal tempo rivela la propria realtà fragile ma anche la forza-motrice di scelte e cambiamenti della vita, rintracciabili a lungo.

Il mio lavoro diventa geografia fisica dell'anima, mappatura delle implicazioni, delle tensioni, delle connessioni dei diversi corpi del nostro mondo.

*«Matter ~ time ~ vulnerability» is the imprint of man, as well as of nature, belonging to the same essence.*

*The re-vealed and dis-figured matter by time reveals its own fragile reality but also the driving force of choices and changes in life, traceable for a long time.*

*My work becomes the physical geography of the soul, mapping the implications, tensions, connections of the different bodies of our world.*
